

# A Relaxed Symmetry-Constrained Non-negative Model for Large-Scale Undirected Weighted Network Representation: Supplementary File

Yurong Zhong, Xin Luo, *Senior Member, IEEE*, and Zidong Wang, *Fellow, IEEE*

This is the supplementary file for the paper entitled *A Relaxed Symmetry-Constrained Non-negative Model for Large-Scale Undirected Weighted Network Representation*. Some supplementary tables and figures illustrating the experimental results are put in this file and cited in the manuscript.

## I. SUPPLEMENTARY TABLES

TABLE S1. All competitors' achieved hyper-parameter settings on D1-6.

No.	D1	D2	D3	D4	D5	D6
<b>M1</b>	$\lambda=2^{-9}$	$\lambda=2^{-6}$	$\lambda=2^{-8}$	$\lambda=2^{-11}$	$\lambda=2^{-12}$	$\lambda=2^{-13}$
